	Scientific seminars	16
<b>3</b>	<b>VERTICAL AREAS</b>	<b>17</b>
	<b>3.1. Pediatric neuroscience</b>	<b>18</b>
	Global numbers of area	18
	PKU and other amino acid genetic diseases	19
	Mitochondrial energy metabolism and development of biomarkers for the investigation of inborn errors of metabolism	20
	Applied research on neuromuscular disorders	21
	Neurometabolic disorders and synaptic studies in rare neurogenetic conditions	22
	Neurogenetics and molecular medicine	23
	<b>3.2. Molecular and cellular biology of developmental tumour</b>	<b>24</b>
	Global numbers of area	24
	Preclinical pharmacology and drug release in solid paediatrics tumours	25
	Leukemia and non-malignant blood disorders	26
	Neuroblastoma	27
	Sarcoma and histiocytosis	28
	Translational genomics	29
	<b>3.3. Adult-age disorders originating in the foetal period or in the early years of life</b>	<b>30</b>
	Global numbers of area	30
	Metabolic endocrinology including ovarian hyperandrogenism, insulin resistance, obesity, metabolic syndrome and diabetes	31
	Early origins of metabolic disease	32
	Neonatal physiopathology	33
	<b>3.4. Infectious diseases and systemic inflammatory response in paediatrics</b>	<b>34</b>
	Global numbers of area	34
	Vaccine-preventable diseases. Diagnostic innovation transversal subline	35
	Infecciones de transmisión vertical e infecciones en pacientes vulnerables	36
	Tuberculosis	37
	Systemic inflammatory response in paediatric age	38

4

► CROSS-SECTIONAL AREAS

**4.1. Genetics, molecular biology and gene therapy**

- Global numbers of area
- Molecular biology and gene regulation of adipose tissue and its pathologies
- Human molecular genetics I
- Human molecular genetics II
- Molecular pharmacology and experimental therapies
- Pharmacological targets in inflammation and metabolic diseases
- Microbiota intestinal

**4.2. Neuropsychology, cognitive and development neuroscience**

- Global numbers of area
- Neuropsychology
- Cognitive neuroscience
- Developmental neuroscience

**4.3. Biomedical engineering**

- Global numbers of area
- Bioinformatics and data analysis platform
- Computer graphics
- Biomaterials and tissue engineering
- Processing and interpretation of biomedical signals
- Instrumentation and bioengineering
- Robotics and Vision
- Medical radiophysics
- Biomechanical Engineering

**4.4. Epidemiology**

- Global numbers of area
- Epidemiology of aging: factors associated with healthy aging
- Impact, risk and prevention of mental disorders
- Healthcare technologies and results in primary care and mental health (PRISMA)

<b>3.5. Mental health</b>	<b>39</b>
Global numbers of area	39
Clinical, cognitive and psychosocial bases of severe mental disorders	40
Mental health interventions	41
Cognitive and neurobiological correlates of psychotic and affective symptoms in severe mental disorder	42
Child and youth mental health research	43
Psychological research group on fibromyalgia and chronic pain (agora group) <i>SGR grup 667</i>	44
Molecular Psychiatry	45
<b>3.6. Foetal / paediatric diseases and environment, metabolic and genetic factors</b>	<b>46</b>
Global numbers of area	46
Paediatric intensive care unit research project group	47
Influence of the environment on child and adolescent welfare	48
Foetal environment and obstetrical complication	49
Impact of congenital heart disease on development: from foetus to adult	50
Paediatric arrhythmias, sudden death and cardiovascular genetics	51

# 1

## FOREWORD

- 1.1. Introduction
- 1.2. Governing and advisory bodies
- 1.3. Services and infrastructures

## 1.1. Introduction

It is a pleasure to show you the annual scientific report of the Institut de Recerca Sant Joan de Déu (IRSJD), which shows once again the great work done by all IRSJD's people. From here, our acknowledgment and gratitude to everyone who, in one way or another, makes possible the continuous improvement of our institution, the scientific results and the transfer of knowledge for the improvement of patients.

During this year, from the Direction of the Institute has been worked on the Strategic Plan for the next four years. Scientific excellence, the consolidation of the human team and the infrastructures, and the promotion and support for the establishment of scientific collaborations and international alliances are the main objectives of this new Plan. In parallel, there has been a long process of reflection, together with the people leading the research groups of the Institute, on the interconnections between the groups of the different centers that make up the IRSJD. This has allowed redefining the cooperative scientific project model of the Institute.

The scientific framework we have had since 2015 has been very useful for showing the nuclear research lines of the Hospital and the transversally of the research groups of the other IRSJD's Centers. The new scientific structure aims to reflect and enhance the common research objectives and lines, and facilitate collaboration between the medical and hospital medical activity and the basic and technological research groups. It is also necessary to make reference to the different agents that are fundamental for quality research, with translation and responsible capacity, such as healthcare professionals, experts in innovation and patient representatives. As of 2019, this new structure will be fully developed.

During 2018, the IRSJD has increased the research projects, clinical trials and scientific publications; in such a way that the indicators obtained allow us to continue with sustained growth. The upstream line in the collection of financing funds and scientific production since the creation of the IRSJD places us in a good position among the research centers in our environment. Just to make some mention in relation to scientific production, we would like to highlight, among others, some publications led by researchers from the different research programs, such as Paediatric Cancer in Clinical Cancer Research (C. Lavarino) and Journal of Controlled Release (A. Montero-Carcaboso); in the field of Neuroscience with publications in Developmental Medicine & Child Neurology by A. García-Cazorla and published by the group of M. Pastor-Anglada at Comprehensive Physiology; and the publications conducted by L. Alsina in Pediatric Allergy and Immunology and L. Ibáñez in Trends in Endocrinology and Metabolism in the Adaptive Response area; Importantly, there have been international collaborations that have been reflected in works published in JAMA Psychiatry, with the participation of A. Koyanagi of the area of Mental Health in the Neurosciences program.

Finally, from the Directorate we would like to encourage you to continue working and collaborating with all of us, and with other national and international centers. We know that we have a great human team to achieve our priority objective: a job of excellence to achieve the best solutions for our patients.

## 1.2. Governing and advisory bodies

### Board of trustees

Joan Elias Garcia	<i>Rector, Universitat de Barcelona</i>
Domènec Espriu Climent	<i>Vice-Rector for Research, Universitat de Barcelona</i>
Jordi Berenguer Sau	<i>Vice-rector for Knowledge Transfer and Innovation, Universitat Politècnica de Catalunya</i>
Francesc Palau Martínez	<i>Director, Institut de Recerca Sant Joan de Déu</i>
Emili Bargalló Angerri	<i>Director, Fundació de Recerca Sant Joan de Déu</i>
Jaume Pérez Payarols	<i>Director for Innovation, Hospital Sant Joan de Déu</i>
Josep Maria Haro Abad	<i>Director for Research, Innovation and Teaching, Parc Sanitari Sant Joan de Déu</i>
Manuel del Castillo Rey	<i>General Manager, Hospital Sant Joan de Déu d'Esplugues de Llobregat</i>
Enric Mangas i Monge	<i>Director, Parc Sanitari Sant Joan de Déu</i>

### Executive Committee Institut de Recerca Sant Joan de Déu

Francesc Palau Martínez	<i>Director, Institut de Recerca Sant Joan de Déu</i>
Rafael Artuch Iribarri	<i>Deputy Director, Institut de Recerca Sant Joan de Déu</i>
Emili Bargalló Angerri	<i>Director, Research Foundation Sant Joan de Déu</i>
Jaume Pérez Payarols	<i>Director for Innovation, Hospital Sant Joan de Déu</i>
Daniela Tost Pardell	<i>Director, Centre de Recerca en Enginyeria Biomèdica (CREB). Universitat Politècnica de Catalunya</i>
Marçal Pastor-Anglada	<i>Director, Institut de Biomedicina - Universitat de Barcelona (IBUB)</i>
Carles Escera i Micó	<i>Institut de Neurociències - Universitat de Barcelona (UBNeuro)</i>
Josep M. Haro Abad	<i>Director for Research, Innovation and Teaching, Parc Sanitari Sant Joan de Déu</i>
Júlia Ribot Ballabriga	<i>Scientific manager, Institut de Recerca Sant Joan de Déu</i>

### Scientific Advisory Council

Antonio L. Andreu	<i>Scientific director. European infrastructure for translational medicine (EATRIS)</i>
Maria A. Blasco	<i>Director. Centro Nacional de Investigaciones Oncológicas (CNIO)</i>
Jordi Camí i Morell	<i>Director. Parc de Recerca Biomèdica de Barcelona &amp; Fundació Pasqual Maragall</i>
Michael B. King	<i>London's Global University. Division of Psychiatry</i>
Marisa Montolio	<i>Scientific director. Duchenne Parent Project, Spain</i>
Carlos Rodríguez-Galindo	<i>Executive vice-president. St. Jude Children's Research Hospital</i>
Maithe Tauber	<i>Paediatric endocrinologist. Institut des Sciences du Cerveau, de la Cognition et du Comportement de Toulouse (ISC3T)</i>
Montserrat Vendrell i Rius	<i>Partner. Alta Life Sciences</i>

### Research commission

Rafael Artuch Iribarri, <i>president</i>
Asteria Albert Cazalla
Pere Caminal Magrans
Carmen de Torres Gómez-Pallete
Carles Escera i Micó
Claudia Fortuny Guasch
Alfredo García-Alix
Àngels García Cazorla
Juan José García García
Maria Dolores Gómez Roig
Josep M Haro Abad
Lourdes Ibáñez Toda
Josep Jiménez Chillardón
Ángel Montero Carcaboso
Carmen Muñoz Almagro
Susana Ochoa Güerre
Francesc Palau Martínez
Marçal Pastor Anglada
Antoni Serrano Blanco
Judith Usall Rodie
Júlia Ribot Ballabriga, <i>secretary</i>

## 1.3. Services and infrastructures

The Institut de Recerca Sant Joan de Déu makes available to its researchers a set of fundamental services and infrastructures for the performance of their projects. In order to facilitate high-level research, the IRJSD offers its professionals technical, scientific and support services as well as the most suitable infrastructures required to carry out their work:

### Scientific core facilities

- Support of the Clinical Trials Unit
- Sequencing Unit
- Confocal Microscopy Unit
- Animal housing facility
- Biobank
- Methodological and statistical support
- Methodological support in neuroimaging
- Scientific and technical evaluations service

### Other scientific and technical services

- UBNeuro Services
- IBUB Services
- CREB Services

### Management support services

- Administration and human resources
- Clinical Research Ethics Committee
- Research management and Promotion
- Management of knowledge and communication

## PATENTS AND UTILITY MODELS

### Nonwoven membrane as a drug delivery System

Date of grant	25/07/2018
Country of protection	AL, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HR, HU, IE, IS, IT, LI, LT, LU, LV, MC, MK, MT, NL, NO, PL, PT, RO, RS, SE, SI, SK, SM, TR
Grant number	EP3108881A1
Applicants	Universitat Politècnica de Catalunya i Hospital Sant Joan de Déu
Inventors	Jose Antonio Tornero Garcia, Angel Montero Carcaboso, Joan Bertran Llavina

### Immunotherapy for Casr-Expressing Cancer (E.G. Neuroblastoma)

Date of grant	18/01/2018
Country of protection	Estats Units
Grant number	US20180207111A1
Applicants	Hospital Sant Joan de Déu i Fundació Cellex
Inventors	Carmen de torres Gómez-Pallete

### Método de clasificación en subgrupos moleculares de pacientes con meduloblastoma

Date of grant	22/11/2018
Country of protection	AE, AG, AL, AM, AO, AT, AU, AZ, BA, BB, BG, BH, BN, BR, BW, BY, BZ, CA, CH, CL, CN, CO, CR, CU, CZ, DE, DJ, DK, DM, DO, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, GT, HN, HR, HU, ID, IL, IN, IR, IS, JO, JP, KE, KG, KH, KN, KP, KR, KW, KZ, LA, LC, LK, LR, LS, LU, LY, MA, MD, ME, MG, MK, MN, MW, MX, MY, MZ, NA, NG, NI, NO, NZ, OM, PA, PE, PG, PH, PL, PT, QA, RO, RS, RU, RW, SA, SC, SD, SE, SG, SK, SL, SM, ST, SV, SY, TH, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, ZA, ZM, ZW
Grant number	PCT/ES2018/070347
Applicants	Hospital Sant Joan de Déu
Inventors	Cinzia Emilia Lavarino, Soledad Gomez Gonzalez

### Betaine for the prevention of obesity

Date of grant	15/11/2018
Country of protection	AE, AG, AL, AM, AO, AT, AU, AZ, BA, BB, BG, BH, BN, BR, BW, BY, BZ, CA, CH, CL, CN, CO, CR, CU, CZ, DE, DJ, DK, DM, DO, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, GT, HN, HR, HU, ID, IL, IN, IR, IS, JO, JP, KE, KG, KH, KN, KP, KR, KW, KZ, LA, LC, LK, LR, LS, LU, LY, MA, MD, ME, MG, MK, MN, MW, MX, MY, MZ, NA, NG, NI, NO, NZ, OM, PA, PE, PG, PH, PL, PT, QA, RO, RS, RU, RW, SA, SC, SD, SE, SG, SK, SL, SM, ST, SV, SY, TH, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, ZA, ZM, ZW
Grant number	WO2018/206763A1
Applicants	Hospital Sant Joan de Déu i Ajinomoto
Inventors	Carlos Lerín Martínez, Jose Carlos Jiménez Chillaron, Marta Ramón Krauel

## SPIN-OFF

### DBGEN Ocular Genomics (co-funders Roser González-Duarte and Gemma Marfany)

## 2.4. Training

### DOCTORAL THESES

A list provided below the 33 doctoral theses presented during 2018 in original language.

Thesis Author	Title	Thesis directors	Date
Javier Rodríguez Fanjul	Neuroprotección mediante terapia combinada (hipotermia+allopurinol) en un modelo animal de daño cerebral hipóxico-isquémico	Alfredo Garcia-Alix	January
Eva Maria Guix Comellas	Influència del seguiment infermer en l'adherència al tractament amb fàrmacs antituberculosos en la població pediàtrica	Antoni Noguera Julian Enriqueta Force Sanmartín	January
Sally Sabra	Maternal heavy metals and toxins exposure and their influences on fetal growth restriction clinical subtypes	Eduard Gratacos Maria Dolores Gómez-Roig	January
María José Fábrega Fernández	Modulation of intestinal immune response by outer membrane vesicles from probiotic and commensal Escherichia coli strains	Laura Baldomà Llavinés Rosa Giménez Claudio	January
Alejandra Darling	Malalties Neurodegeneratives Associades a Dipòsit Cerebral de Ferro: caracterització clínica i genètica	Belén Pérez Dueñas	February
Estrella Rubio Solsona	Estudio funcional de la proteína ANKK1 en el músculo esquelético: implicaciones en distrofias musculares	Janet Hoenicka y Francesc Palau	March
Tannia Valeria Carpio Arias	Aspectos cronobiológicos, emocionales y nutricionales en pacientes con Trastorno de Déficit de Atención e Hiperactividad	Jose Angel Alda	March
Gaia Botteri	Novel potential determinants in endoplasmic reticulum stress, inflammation and insulin resistance: Apo CIII and sAPPbeta	Manel Vazquez Carrera	March
Gemma Escuder Romeva	Necessitats de la població atesa a les unitats psiquiàtriques penitenciàries de Catalunya	Susana Ochoa Güerre	April
Miguel Mª Alsina Casanova	Disfunción multiorgánica en el recién nacido con encefalopatía hipóxico-isquémica en la era de la hipotermia terapéutica	Alfredo Garcia-Alix Pérez	May
Ana Esteve Solé	Estudio de los defectos primarios y secundarios de la vía IL12-Interferón gamma-TNFalfa con susceptibilidad a la infección por microorganismos intracelulares.	Laia Alsina Manrique de Lara Manel Juan Otero	May
Albert Viel Oliva	Determinants estructurals i implicacions funcionals de l'interactoma proteic d'hCNT1	Marçal Pastor-Anglada	June
Hamsa Jameel Banjer	Role of the human Concentrative Nucleoside Transporter 1 (hCNT1) in oncogenesis	Marçal Pastor-Anglada	June
Gabriel Porcel Fernandez	Estudio del matrisoma y secretoma de fibroblastos humanos de piel, en el contexto de las distrofias musculares congénitas	Cecilia Jiménez Mallebrera	June
Guillem Pascual Pastó	Farmacocinètica i eficàcia preclínica de teràpies innovadores pel retinoblastoma refractari.	Angel Montero Carcaboso	June

Thesis Author	Title	Thesis directors	Date
Montserrat Torrebadell Burriel	Análisis del valor pronóstico del perfil de expresión génica en la leucemia mieloblástica aguda de riesgo citogenético intermedio según la opción terapéutica post-remisión	Jordi Esteve Reyner Mireia Camós Guijosa	June
Anna Mensa-Vilaró	Implicació del mosaïcisme genètic en les immunodeficiències primàries	Juan Ignacio Aróstegui Jordi Antón	July
Daniel Natera	Application of CRISPR/Cas9 technology in collagen VI dominant mutations on human dermal fibroblasts	Caterina Marqués Gornés	July
Caterina Marques	Aplicación de CRIPSR/Cas9 para editar mutaciones dominantes en genes de colágeno VI en fibroblastos	Cecilia Jiménez Mallebrera	July
Julia Rebeca Sevilla Llewellyn-Jones	Clinical personality traits in high risk and recent onset of psychosis patients	Berta Moreno Kustner Susana Ochoa Güerre	July
Mohammad Zarei	Unveiling the role of PPARbeta/delta on non-alcoholic fatty liver disease	Manel Vazquez Carrera	September
Nerea Vega García	Estudi del perfil d'expressió de les histones deacetilasa (HDAC) en pacients pediàtrics amb leucèmia aguda	Mireia Camós Guijosa	October
Júlia Ballester-Plané	Beyond the motor impairment in dyskinetic cerebral palsy: neuropsychological and connectome-based approach	Roser Pueyo Benito	October
Liska Caviedes Cárdenas	Proteína multifuncional ADE2 como nexo entre vías de recuperación y síntesis de novo de nucleosídos	Marçal Pastor-Anglada	October
Marta Ramon Krauel	Nutrició perinatal i programació de risc metabòlic a llarg termini: estudi de possibles mecanismes i intervencions en models d'experimentació animal.	Josep Jimenez-Chillarón Carles Lerín	October
Judit Cabana Dominguez	Genètica i dependència de cocaïna: Estudis d'associació, transcriptòmica i models animals	Bru Cormand Noèlia Fernández	October
Olga Laporta-Hoyos	Neuroimaging and executive function in dyskinetic cerebral palsy	Roser Pueyo Benito	October
Lorena Medina Pulido	Nuevas funciones de los transportadores concentrativos de nucleosídos CNT1 y CNT2.	Marçal Pastor-Anglada Sandra Pérez Torras	November
Sandra Moro Villa	Nuevas implicaciones de los transportadores concentrativos de nucleosídos asociadas a la biología tumoral	Marçal Pastor-Anglada Sandra Pérez Torras	November
Rosa Torres Ferraz	Pla de desenvolupament d'una nova combinació de fàrmacs pel tractament de la Síndrome de l'Ovari Poliquístic: del mercat al mercat	Lourdes Ibáñez Clara Campàs	Desember
Marta Chamorro Fernández	Evaluación de los patrones de sueño en niños con TDAH de nuevo diagnóstico comparado con controles sanos	Jose Angel Alda	Desember
Laura Domènech-Salgado	A comprehensive multiomics approach towards understanding obsessive-compulsive disorder	Raquel Rabionet Eulàlia Martí Xavier Estivill	Desember
Olga Casulleras Gras	Regulació del transportador de nucleòsids d'alta afinitat hCNT3 per proteïnes d'interacció	Marçal Pastor-Anglada Sandra Pérez Torras	Desember

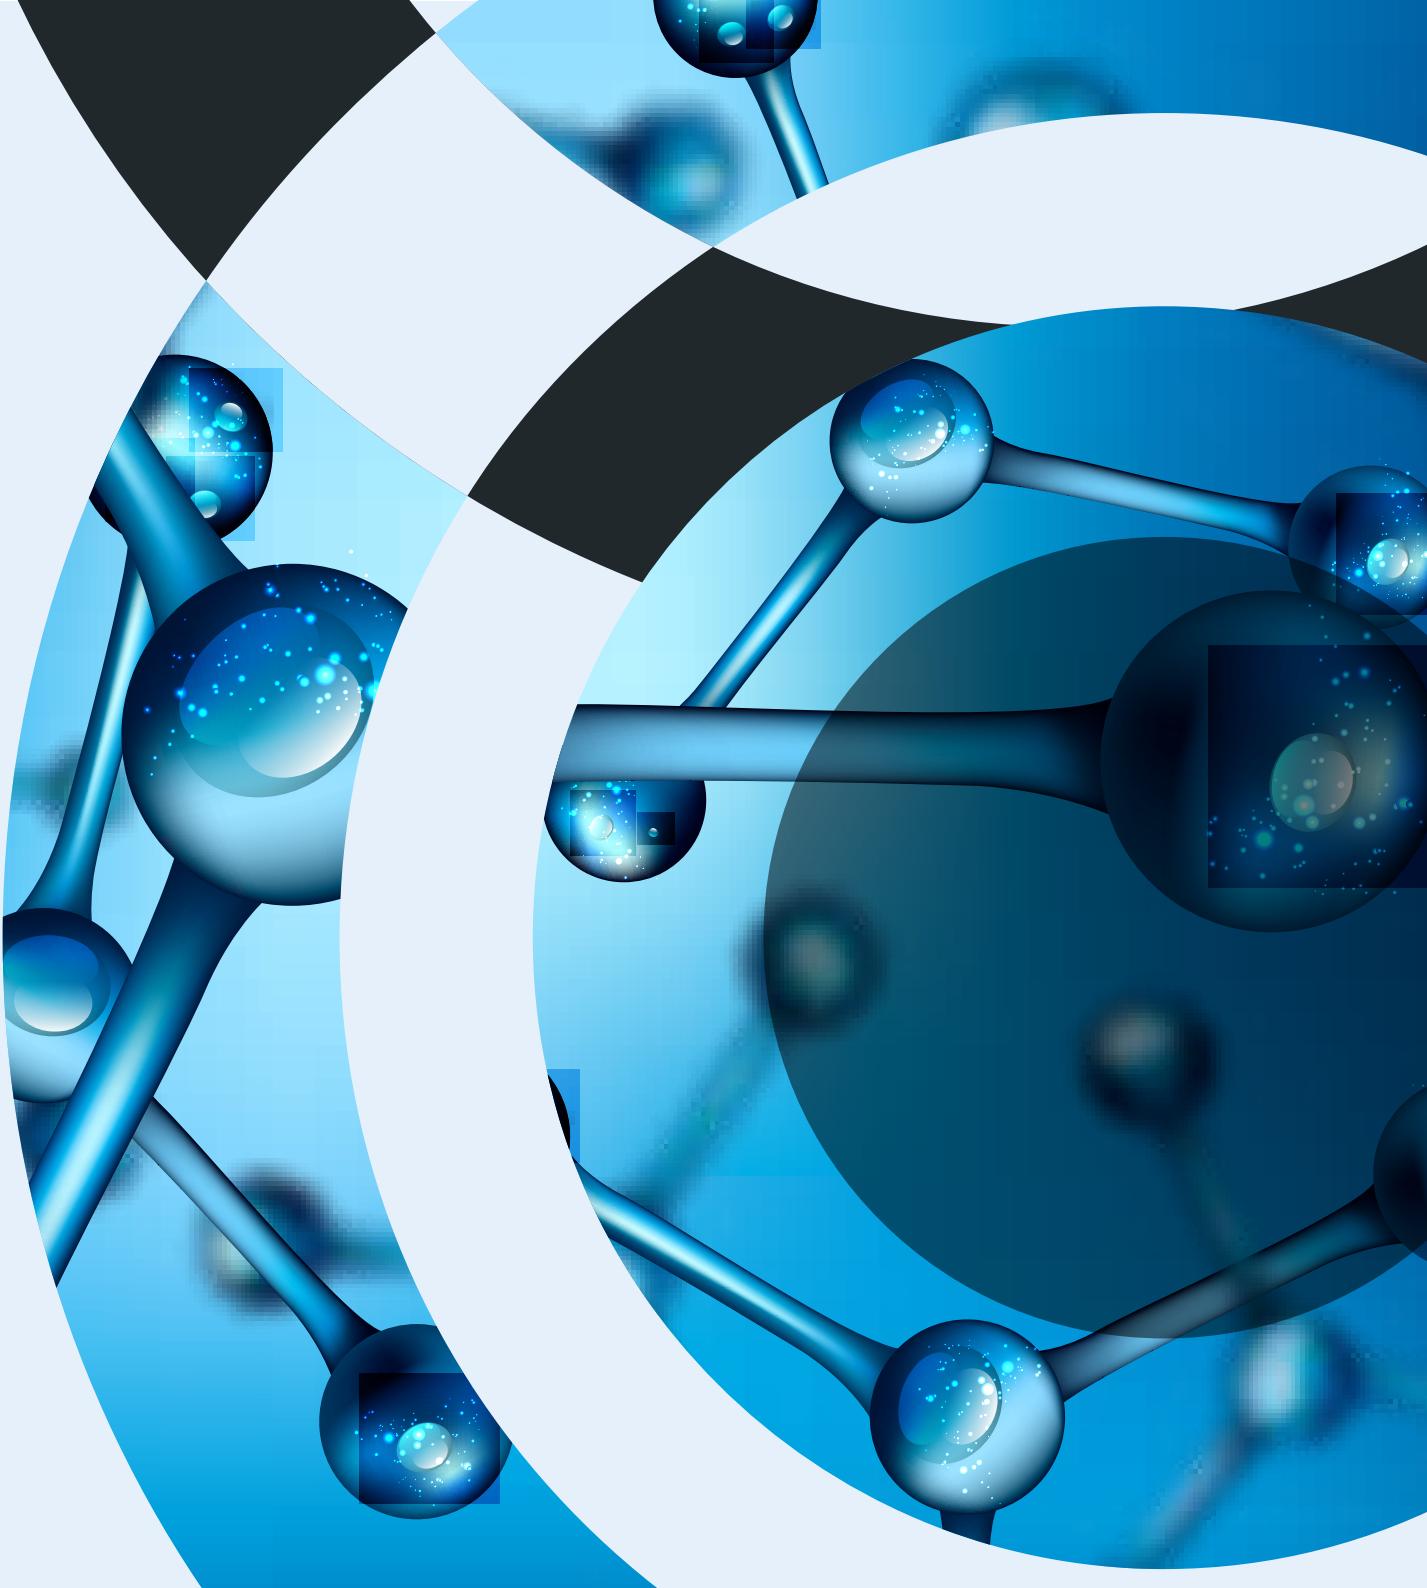

## SCIENTIFIC SEMINARS

- January, 9. Flu vaccination among healthcare personnel and vaccination recommendations for the adult population. **Ángela Domínguez García, PhD.**
- January, 23. Initial medication non-adherence: what lies behind this attitude?. **Montserrat Gil Girbau.**
- February, 1. 2nd Scientific Conference of the Institut de Recerca Sant Joan de Déu Barcelona (IRSJD).
- February, 6. Electrophysiological brain markers of cognitive function in neonatology and neuropaediatrics. **Carles Escera, PhD.**
- February, 20. Neonatal immune system in health and illness. **Laia Alsina, MD, PhD & Ana Esteve-Solé MSc.**
- March, 6. New insulin resistance mechanisms in skeletal muscle. **Gaia Botteri.**
- March, 20. Molecular mechanisms underlying development of the nervous system in health and disease. **Elisa Martí, PhD.**
- April, 10. NGS approaches in the study of complex disorders: a study of association of rare variants in obsessive-compulsive disorder. **Raquel Rabionet Jansse, PhD.**
- April, 24. Tyrosine hydroxylase deficiency: studies in patients and in a cellular model. **Alba Tristan Noguero.**
- May, 7. Training of executive function in childhood obesity: food choice, quality of life and brain connectivity. **Ma. Àngels Jurado, PhD.**
- May, 22. ANKK1 and the molecular bases of addiction: from vulnerable brain structure to induced changes. **Janet Hoenicka, PhD.**
- June, 5. Impact of a mindfulness intervention (MBSR) on clinical severity and inflammatory biomarkers in patients with fibromyalgia. **Laura Andrés Rodríguez.**
- June, 7. Early detection of infant's at risk for Cerebral Palsy: Early neuroimaging and clinical biomarkers. **Roslyn N. Boyd, PhD.**
- June, 16. Roche Scientific Seminar: Multidisciplinary approach of clinical microbiology. **Pedro Brotons, Carmen Muñoz-Almagro, PhD & MD.**
- June, 19. New generation sequencing for diagnosis of hereditary metabolic diseases. **Dèlia Yubero Siles, PhD.**
- June, 28. Calibration-based routines for imputing categorical variables in complex data. **Recalí Yucel, PhD.**
- July, 17. Advances in regenerative medicine. **Gorka Oriv, PhD.**
- October, 9. Changes in GABAergic synapse in Rett syndrome. **Alfonso Luis de Oyarzabal Sanz, PhD.**
- October, 12th edition of the Course on Economic Assessment of Healthcare and Social Programmes and Services.
- October, 23. Gate2Brain peptides: from discovery to applications. **Meritxell Teixidó, PhD.**
- October, 24. 1st Discussion Conference IRSJD 2018 – Mental Health.
- November, 6. Mitochondrial DNA deletions: Quantitative evaluation of single and multiple deletions generation and expansion in single cells. **Selena Trifunov, PhD.**
- November, 20. EUDAIMON STUDY. Effectiveness of the MBSR programme in the treatment of fibromyalgia: a controlled randomised clinical trial. **Adrià Pérez Aranda.**
- November, 23 & 26. International mini-symposium: Models and therapies for Rare Diseases. **Cecília Jiménez-Mallebrera, PhD & Alba Tristán.**
- December, 4. Effectiveness of Metacognitive Training (MCT) in persons with recent-onset psychosis. **Susana Ochoa, PhD & MD.**
- December, 13. Workshop H2020: "How to Write a Competitive Proposal for Horizon 2020". **Sean McCarthy.**
- December, 18. Translational Data Science in Pediatric Oncology. **Soledad Gómez González, PhD.**

# MITOCHONDRIAL ENERGY METABOLISM AND DEVELOPMENT OF BIOMARKERS FOR THE INVESTIGATION OF INBORN ERRORS OF METABOLISM

Rafael Artuch Iriberry, MD, PhD

## This year's highlights

Our group increased its critical mass with the inclusion of two new post-doctoral researchers from another group in the neurosciences area who are expert clinical researchers on movement-related and neurodevelopmental disorders. We consequently increased our financing in competitive research projects and in the generation of scientific knowledge via publications. In the field of internationalisation, it may be noted that two members of our group were designated in 2018 as members of the scientific advisory board of the international laboratory quality control programme called ERNDIM, which is specialised in the analysis of biomarkers for the study of hereditary metabolic disorders.

## Members

### Staff researcher

Aida Ormazabal Herrero, Cristina Sierra March, Délia Yubero Siles, Mercedes Serrano Gimaré

### Postdoc - associate researcher

Mercedes Casado Rio, Raquel Montero Sánchez, Juan Darío Ortigoza Escobar

### PhD student

Abraham José Paredes Fuentes

### Technician

Yahel Calzadilla Borras, Aroa Fernández de Miguel, Juan Moreno García, Tania Pardal Chofle

## Selected projects

- Molecular diagnosis of mitochondrial oxidative phosphorylation defects: pathogenesis of CoQ10 deficiencies. FIS 2017. Instituto de Salud Carlos III (ISCIII). PI: Rafa Artuch Iriberry. 01/01/2018-31/12/2020
- FIS 2017\_Cerebellar atrophy in childhood: development of clinical-radiological tools for precision phenotyping, integral diagnostic algorithm, and identification of new genes. FIS 2017. Instituto de Salud Carlos III (ISCIII). PI: Mercedes Serrano Gimaré. 01/01/2018-31/12/2020
- Study of trace elements (Cu, Zn, Se and Mn) in cerebrospinal fluid in paediatric patients and analysis of related biomarkers. Instituto de Salud Carlos III (ISCIII). FIS. PI14/00032. PI: Aida Ormazabal Herrero. 01/01/2015-30/06/2018

## Selected clinical trials & observational studies

- FSJD-PMM2-2016. Phase II clinical trial to assess the effectiveness and safety of acetazolamide in the treatment of cerebellar syndrome in patients with PMM2-CDG deficiency. Codi EUDRACT: 2017-000810-44. PI: Mercedes Serrano Gimaré. 02/06/2017-

## APPLIED RESEARCH ON NEUROMUSCULAR DISORDERS

Cecilia Jiménez Mallebrera, MD, PhD

### This year's highlights

We began 2019 with the award of two new grants for two projects that start off two research lines. One line, dealing with spinal muscular atrophy, is financed by the association Galicia AME for two years and its aim is to identify early biomarkers of response to treatment with antisense oligonucleotides in collaboration with Hospital de Sant Pau. The goal of the other research line is to investigate the efficiency of CRISPR/Cas genome-editing to correct dominant mutations in collagen VI genes and it is financed by CIBERER and by the association Noelia. These two grants have allowed us to contract pre-doctoral and post-doctoral personnel to carry out these projects.

### Members

#### Staff researcher

## NEUROGENETICS AND MOLECULAR MEDICINE

Francesc Palau Martínez, MD, PhD &  
Janet Hoenicka Blanco, MD, PhD

### This year's highlights

The Neurogenetics and Molecular Medicine (NeuroGene) research group carries out its scientific and translational work in the field of experimental biomedicine for neurogenetic and neuropsychiatric disorders, and in the clinical sphere of the Paediatric Institute for Rare Diseases (IPER). The scientific milestones reached in 2018 include, among others: (1) Description of ANKK1 as a myogenesis biomarker and its relation to Duchenne muscular dystrophy (Rubio-Solsona et al. PLoS One 2018). (2) Relation between variants of the D3 dopamine receptor and addiction in early-onset Parkinson's disease (Castro-Martínez et al. Parkinsonism Relat Disord 2018). The training and dissemination activities included, among others, the coordination of the monographic issue "Science, medicine and reality of rare diseases" published by the journal ARBOR, and the work of F. Palau as editor-in-chief of the publication Orphanet Journal of Rare Diseases.

## PRECLINICAL PHARMACOLOGY AND DRUG RELEASE IN SOLID PAEDIATRICS TUMOURS

Angel Montero Carcaboso, PhD

### This year's highlights

Notable achievements in 2018 included the following: (i) Award of the Schweisguth Prize of the International Society for Paediatric Oncology (SIOP) for our research on a new treatment with oncolytic adenoviruses in retinoblastoma. This prize was awarded to Dr. Guillem Pascual Pastó and it was presented orally at the 50th SIOP Congress (Kyoto, Japan, 16-19 November 2018). (ii) Award of a competitive project of ISCiii to continue our work on retinoblastoma (starting in January 2019). (iii) Award of a Miguel Servet Type 2 contract of ISCiii (starting in January 2019). Our proposal scored the highest in the 2018 call.

### Selected projects

- Cure4RB. Ministry of Economy and Competitiveness (MINECO) - Cooperation challenges 2015. RTC-2015-4319-1. PI: Angel Montero Carcaboso. 01/07/2015-31/12/2018. The most significant scientific results are published in the journal *Science Translational Medicine* (January 2019). The clinical trial FSJD-RTB-2015 was continued in 2018 and patients continued to be recruited as well.
- Immune therapy of diffuse intrinsic pontine glioma (DIPG). Instituto de Salud Carlos III (ISCIII) - FIS. PI15/01161. PI: Angel Montero Carcaboso. 01/01/2016-31/12/2018. Part of this project's most significant scientific results were published in the journal *Frontiers in Oncology* (April 2018). The clinical trial FSJD-DIPG-DC completed the inclusion of patients.

### Selected clinical trials & observational studies

- FSJD-DIPG-DC. Phase I. Phase Ib clinical trial on the safety of immune therapy with autologous dendritic cells pulsed with lysate of allogenic tumour cell lines in patients with diffuse intrinsic pontine glioma (DIPG). Codi EUDRACT: 2015-003362-84. Promotor: Fundació Sant Joan de Déu. PI: Andrés Morales La Madrid. 06/06/2016 - We took part in the conception, preclinical justification and analysis of samples.
- FSJD-RTB-2015. Phase I. Single-centre, open phase I clinical trial with escalating dose to assess the safety and activity of VCN-01 oncolytic adenovirus in patients with refractory retinoblastoma. Codi EUDRACT: 2016-001060-11. Promotor: Fundació Sant Joan de Déu. PI: Jaume Catalá Mora. 03/08/2017-. We participated in the conception, preclinical justification, methodological design and analysis of samples, and shared the intellectual property.
- GEIS-39. Phase II trial of nab-paclitaxel for the treatment of desmoid tumors and multiply relapsed/refractory desmoplastic small round cell tumors and Ewing sarcoma. Codi EUDRACT: 2016-002464-14. Promotor: Grupo Español de Investigación en Sarcoma Grupo GEIS. PI: Jaume Mora Graupera. 18/05/2017-. We took part in the preclinical justification and coordinated the translational study of the clinical trial.

### Selected publications

- Bukchin A, Pascual-Pastó G, Cuadrado-Vilanova M, Castillo-Ecija H, Monterrubio C, Olaciregui NG, et al. Glucosylated nanomicelles target glucose-avid pediatric patient-derived sarcomas. *J Control Release* 2018; 276: 59-71. FI: 7,877(Q1)
- In this study we proved that the release of drugs to paediatric sarcomas (rhabdomyosarcomas and Ewing's sarcomas) can be increased, taking advantage of these tumours' glucose avidity. If we encapsulate the drugs with glucose-coated polymers, we obtain some micelles (a type of nanoparticles) that are captured by tumours better and more quickly than non-encapsulated drugs. The publication *Journal of Controlled Release* is one of the most highly reputed in the field of pharmacy and pharmacology.
- Manzanares-Quintela A, Restrepo-Perdomo CA, Botteri G, Castillo-Ecija H, Pascual-Pastó G, Cano F, et al. Tissue Compatibility of SN-38-Loaded Anticancer Nanofiber Matrices. *Adv Health Mater* 2018; 7(15): 1800255. FI: 5,609(Q1)
- This study is the first preclinical characterisation of the tissular compatibility of a new drug release system based on polymer nanofibre matrixes containing a powerful anticancer drug. We proved that nanofibre matrixes, placed on various healthy tissues including liver, blood vessels and nerves, produce only a mild local inflammatory reaction with no changes in the biochemical profiles relating to haematological, hepatic or renal activity. The journal *Advanced Healthcare Materials* is one of the most highly reputed publications in the field of biomedical engineering.
- Meel, M. H., M. C. de Gooijer, M. Guillen Navarro, P. Waranecki, M. Breur, L. C. M. Buil, L. E. Wedekind, J. W. R. Twisk, J. Koster, R. Hashizume, E. H. Raabe, A. Montero Carcaboso, M. ## LEUKEMIA AND NON-MALIGNANT BLOOD DISORDERS

Mireia Camós Guijosa, MD, PhD

### This year's highlights

The Hereditary Erythropathology Unit of Hospital Sant Joan de Déu - Hospital de la Santa Creu i Sant Pau has been accredited as a CSUR (National Health System Reference Centre), which will help to strengthen our research activity in this field.

At the international meeting of the NOPHO group held in Gothenburg, Dr Montserrat Torrebadell presented the nation-wide results of the clinical trial NOPHO-DBH-AML 2012 for acute myeloid leukaemia.

At our hospital, Dr Susana Rives leads various clinical trials of cell therapy with CART19, which provide a therapeutic alternative for patients with high-risk acute lymphoblastic leukaemia.

### Members

## SARCOMA AND HISTIOCYTOSIS

Jaume Mora Graupera, MD, PhD

### This year's highlights

2018 was marked by the completion of the study period on Ewing's sarcoma financed by the cooperative group grant of AECC (5 years). It has been a key driving factor for the group in the study of the epigenetics of Ewing's sarcoma and it should culminate in 2019 with the most ambitious publication in 5 years, which is the outcome of the work carried out during these 5 years. The continuity of the study in this field is ensured by the acquisition of the FIS project now in progress, the new interactions with outstanding groups in this field, such as the CRG group led by Luciano di Croce, and the cooperation with Angel Raya's group of the Reparative Medicine Institute of Catalonia. 2018 was marked by the group's international positioning with the largest number of immunotherapy clinical trials to date through the Ymabs company for the treatment of neuroblastoma patients. These studies draw patients from around the world and this has allowed us to acquire a uniquely broad experience with an immense number of patients. This number continues to grow, with all that this entails in terms of acquiring new knowledge and generating treatment protocols specific to our group.

## METABOLIC ENDOCRINOLOGY INCLUDING OVARIAN HYPERANDROGENISM, INSULIN RESISTANCE, OBESITY, METABOLIC SYNDROME AND DIABETES

Lourdes Ibáñez Toda, MD, PhD

### This year's highlights

In 2018 the metabolic endocrinology group has focused its research on the longitudinal prospective study of epigenetic, clinical and biochemical aspects of subjects born small for gestational age (SGA), and of adolescents with ovarian hyperandrogenism or polycystic ovary syndrome (PCOS). The longitudinal cohorts of SGA children and of adolescents with PCOS have been followed up, and new patients have been recruited, allowing us to determine the relation between liver volume and fat, and visceral adiposity in prepuberal SGA children (Malpique et al. *Int J Obes* 2018), and the effects of a new combination of insulin action sensitizers and an antiandrogen (SPIOMET) on Fetus-A levels in adolescents with PCOS (Díaz-Silva M et al. *Int J Endocrinol* 2018).

Carmen Muñoz Almagro, MD, PhD

### This year's highlights

In 2018 the group continued to consolidate its research activity with 5 FIS projects on characterisation of nasopharyngeal microbiota in invasive pneumococcal disease, characterisation of nasopharyngeal microbiota in rhinovirus infection, molecular characterisation of *B. pertussis*, impact of adding PCV13 vaccine to the systematic calendar, and assessment of a new diagnostic algorithm for severe pneumonia in PICU. Likewise, the group has continued to cooperate with research networks of excellence of both national (CIBERESP) and European (PERTINENT, SPIDNET) scope, as well as with industry, conducting 4 validation or verification studies on new rapid diagnosis devices for infections and 5 pharmacological clinical trials. These activities have been disseminated through 12 scientific articles published in impact journals (5 of them in the first quartile).

# INFECCIONES DE TRANSMISIÓN VERTICAL E INFECCIONES EN PACIENTES VULNERABLES

Clàudia Fortuny Guasch, PhD, MD

## This year's highlights

In 2018, we began the study financed by the FIS grant in relation to the mitochondrial toxicity of the drugs used in the treatment of congenital CMV infection. The recruitment was slower than expected but by the end of the year we had included 8 patients. Despite the slow and laborious recruitment process, we believe that we now have a significant number of included patients and this should allow us to obtain some very interesting results.

Additionally, we continued with the CCTs with antivirals for treatment of HCV and HIV infection. We also continued to cooperate with other groups on the study of patients with HIV infection, in relation to its treatment, effects, natural history, co-infections, transfer to adult units, etc.

## TUBERCULOSIS

Antoni Noguera Julián, PhD, MD

### This year's highlights

Recruitment for the studies of isoniazid pharmacokinetics in newborns and small children continued in 2018. This recruitment is a slow and laborious process but we hope that we now have a significant number of included patients, which should allow us to obtain some very interesting results.

On the other hand, the studies are continuing on the diagnosis of tuberculosis infection in at-risk paediatric populations and on the role that may be played in this connection by the new tests for detection of *Mycobacterium tuberculosis*-specific gamma interferon. Lastly, the first doctoral thesis arising from the research line, on adherence to tuberculosis treatment in children and adolescents (Dr Eva María Guix Comellas), was successfully defended in 2018.

## SYSTEMIC INFLAMMATORY RESPONSE IN PAEDIATRIC AGE

Jordi Antón López, MD, PhD &  
Laia Alsina Manrique, MD, PhD

### This year's highlights

Our group is the leader in Spain in the study of immunodeficiencies secondary to the use of anti-TNF $\alpha$  monoclonal drugs during pregnancy, and in the study of primary immunodeficiencies associated with intracellular infections (such as mycobacteria and leishmania). Likewise, a research line has been started in the growing field of primary immunodeficiencies with predominant component of immune deregulation [inflammation, lymphoproliferative disorders, autoimmunity], with particular interest in the study of cells with a regulatory function (regulatory T and B lymphocytes) and in the use of sirolimus/rapamycin in their treatment. Our group has taken part in key clinical trials on the handling of autoinflammatory disorders, juvenile idiopathic arthritis and systemic lupus erythematosus, and on the analysis of safety profiles with biological drugs. We are also a national reference centre in the study of such disorders as juvenile dermatomyositis, juvenile idiopathic arthritis-associated uveitis, and Kawasaki disease.

## 3.5. Mental Health

Coordinators: Susana Ochoa Güerre, MD, PhD and Judith Usall Rodié, MD, PhD

## CLINICAL, COGNITIVE AND PSYCHOSOCIAL BASES OF SEVERE MENTAL DISORDERS

Susana Ochoa Güerre, PhD, MD

### This year's highlights

In the follow-up study of patients with a first psychotic episode, we have continued to work in the FIS line on traumatic and protective factors granted in 2016. In this year we obtained a PFIS grant linked to the project. A FIS grant has been obtained to assess the effect of attachment on metacognition and social cognition in patients with schizophrenia, patients with first psychotic episodes and healthy controls.

Work was continued on the validation of instruments for patients with psychosis. In the field of prison mental health, this year the first thesis was presented at the PSSJD on this subject.

A series of papers was published in connection with the POMONA study in the sphere of intellectual disability and mental health.

## MENTAL HEALTH INTERVENTIONS

Judith Usall Rodié, MD, PhD

### This year's highlights

A new paper was published on the EU m-Resist project.

The FIS Individual Metacognitive Training project on patients with a first psychotic episode was closed in 2018 and a paper on the results is being prepared for publication. We have continued to recruit patients in the SCORES study of psychological intervention to improve emotional recognition in patients with postmenopausal schizophrenia.

A new paper has been published on the results of biomarkers in the clinical trial of treatment with raloxifene in patients with schizophrenia.

# COGNITIVE AND NEUROBIOLOGICAL CORRELATES OF PSYCHOTIC AND AFFECTIVE SYMPTOMS IN SEVERE MENTAL DISORDER

Gildas Brebion, PhD

## This year's highlights

We have continued with the analyses of the data derived from earlier projects and we have written the respective articles. We have also continued to recruit patients with schizophrenia and depression for our study of auditory verbal hallucination, financed by ISCIII (file PI14/00047). Likewise, inasmuch as we have a sample of 48 healthy participants, we have written a preliminary article on the relation between the incapacity to monitor inner speech and the propensity for non-clinical auditory verbal hallucination. We have also analysed the data corresponding to the effects of depression and anxiety on verbal memory in the healthy sample and we have begun to report the results in an article.

# CHILD AND YOUTH MENTAL HEALTH RESEARCH

Montserrat Dolz Abadia, MD, PhD

## This year's highlights

The "Mental disturbances in childhood and adolescence" group (CIBERSAM) has become consolidated in recent years, both in terms of research collaborations established on various levels, and in terms of project financing. On the one hand, the group cooperates in a stable manner with other groups of the CIBERSAM mental health biomedical research network, such as group G04 of the Hospital Clínic i Provincial de Barcelona (psychosis project). Additionally, a national networked research cooperation project led by the Autonomous University of Madrid has been started (autism project). It should be pointed out that, over the course of the year, we have consolidated our cooperation with international centres (MIND Institute, ISI-Global, MNC Melbourne). Likewise, public projects (FIS, MINECO projects) and European projects (European Commission) as well as private projects have been financed. Notable achievements in the past year have included the grant of two projects with participation of competitive funds: PERIS, Dr Sintes, with the collaboration of the GRETA group (Group for Study and Treatment of Self-Injury) in the study of self-harming behaviour; and Dr Alda in the study of ADHD and ASD and microbiota. Also to be noted was the award of a mobility grant to Dr Dolz by the Carlos III Health Institute. The group (PI: Dr Camprodón) has recently become a collaborating centre in a European Horizon 2020 project (ERC, reference: No 785994) which is conducted at ISGlobal Barcelona (PI: Dr Sunyer), studying the effects of prenatal exposure to urban air pollution and pre- and postnatal cerebral development. We also participated in two clinical trials: one is a European test (reference: 2015-003503-39) addressed to assessing the effectiveness of omega-3 treatment in patients with risk of developing psychosis, and the other is a trial of worldwide scope, with private financing and using drugs, that deals with depression with suicidal ideation [ESKETINSU12002]. Likewise, the research group has been involved in R&D projects in collaboration with the universities URL, UOC and UB (PI: Dr Serrano; PI: Dr Matalí). Lastly, at national level, we have received a number of prizes for different research studies (for example, the AEPNyA award).

## PSYCHOLOGICAL RESEARCH GROUP ON FIBROMYALGIA AND CHRONIC PAIN (AGORA GROUP) SGR GRUP 667

Juan Vicente Luciano Devis, PhD

### This year's highlights

Last year the AGORA group obtained a predoctoral FI grant from AGAUR awarded to Laura Andrés Rodríguez (with Dr Luciano as thesis director). Dr Feliu, together with Dr Borràs, directed the master's degree dissertation of Natalia Angarita Osorio, presented at UAB. One of the most important aspects was the start-up of the ULTREYA project (2018-2020), which seeks to assess the short- and long-term effects of the pilgrimage to Santiago de Compostela on mental health and quality of life, and to determine which personal characteristics predict a bigger change in the collected health variables. This is a prospective observational study in which participants answer an online battery of questionnaires (on anxiety, depression, psychological well-being, etc.) on beginning the pilgrimage, on ending it and 3 months after ending it. This project includes the collaboration of researchers of PSSJD (Dr Luciano and Dr Feliu), Hospital de la Santa Creu i Sant Pau (Dr Soler), University of Zaragoza (Dr García Campayo) and São Paulo Federal University (Dr Demarzo). Project website: <http://estudiocamino.org/>

## MOLECULAR PSYCHIATRY

Belen Ramos Josemaría, PhD

### This year's highlights

- A FIS Health Research multi-centre project has been obtained to study gene expression regulators as biomarkers in psychoses related to cognitive functioning and neuroimage changes. Our group is the project coordinator.
- We have continued recruitment in the project associated with the Miguel Servet contract for the study of biomarkers in recent-onset psychosis and chronic schizophrenia.
- A study of large-scale quantitative proteomics in post-mortem brain tissue has been conducted in the project associated with the Miguel Servet contract for the study of biomarkers in recent-onset psychosis and chronic schizophrenia. Collaboration with Dr Villen's group at the University of Washington (Seattle, USA)
- A new paper has been published on the SP1 and SP4 transcription factors in relation to the improvement of symptoms in the clinical trial of treatment with raloxifene in patients with postmenopausal schizophrenia.
- A new paper has been published on 22 genes involved in inflammatory processes and immune response in post-mortem dorsolateral cortex in geriatric patients with chronic schizophrenia in relation to microglia.
- A new doctoral student from the Neurosciences Programme of the Autonomous University of Barcelona (UAB) has been added to the group for the development of the project on detection of lipid drops in cells of the white series in psychosis as possible biomarkers. Collaboration with Dr Montserrat Torrebadall (HSJD) and Dr Enrique Claro (UAB).

## 3.6. Foetal / Paediatric Diseases and environment, metabolic and genetic factors

Coordinator: Maria Dolores Gómez-Roig, MD, PhD

## PAEDIATRIC INTENSIVE CARE UNIT RESEARCH PROJECT GROUP

Francisco José Cambra Lasaosa, MD, PhD

### Members

#### Staff researchers

Mónica Balaguer Gargallo, Elisabeth Esteban Torne, Iolanda Jordán García, Martí Pons Òdena

#### Assistant researcher

Carme Alejandre Galobardes, Sergio Benito Fernández, Patricia Corniero Alonso, Aida Felipe Villalobos, Elena Fresán Ruiz, Lluisa Hernandez Platero, Nuria Millán García del Real, Susana Segura Matute, Marta Serradell Orea, David Vila Pérez

#### Collaborator researcher

Montserrat Esquerda Areste

### Selected projects

- Analysis of a diagnostic algorithm for severe pneumonia in critically ill paediatric patients, using pulmonary ultrasound and procalcitonin, as a plan to improve healthcare quality. FIS 2016. Instituto de Salud Carlos III (ISCIII). Proyectos de investigación en salud. PI: Iolanda Jordán García. 01/01/2017-31/12/2019
- Predoctoral contracts for health research training. Beneficiari: Sara Bobillo. PFIS 2017. Instituto de Salud Carlos III (ISCIII). PFIS. PI: Iolanda Jordán García. 31/01/2018-29/01/2022
- Assessment of the neuroprotective effect of dexmedetomidine on a paediatric animal model of extracorporeal circulation and circulatory failure. BECA FRANCISCO RUZA 2018. Sociedad y Fundación Española de Cuidados Intensivos Pediátricos (SECIP). BECA FRANCISCO RUZA. PI: Sergio Benito Fernández. 01/04/2018-31/03/2020

### Selected clinical trials & observational studies

- LJ501-CRH04. Randomised placebo-controlled double-blind multicentre study on the effectiveness and safety of LJPC-501 in paediatric patients aged > 2 to 17 years with catecholamine-resistant hypotension associated with distributive shock. Codi EUDRACT: 2017-005153-37. PI: Iolanda Jordán García. 06/11/2018-
- MET51. Phase III. Immunogenicity and safety of a quadrivalent anti-meningococcal conjugate vaccine in research on infants aged 12 to 23 months. EUDRACT: 2016-000749-30. Promoter: Sanofi-Aventis S.A. IP: Iolanda Jordán García. 15/12/2016-

### Selected publications

## INFLUENCE OF THE ENVIRONMENT ON CHILD AND ADOLESCENT WELFARE

Carles Luaces Cubells, MD, PhD

### This year's highlights

- Contribution to the drafting of the Protocol of action in response to childhood/adolescence abuse in the health field (published by the Secretariat for Public Health. Health Department. Barcelona, March 2019). [http://salutpublica.gencat.cat/.content/minisite/aspcat/promocio\\_salut/infancia-i-adolescencia/05maltractamentinfantojuvenil/protocol-actuacio-maltractaments-infancia.pdf](http://salutpublica.gencat.cat/.content/minisite/aspcat/promocio_salut/infancia-i-adolescencia/05maltractamentinfantojuvenil/protocol-actuacio-maltractaments-infancia.pdf), forming part of the Working Group for the Revision of the Protocol for Childhood/Adolescence Abuse, and of the Subcommittee on the Healthcare and Judicial Communication Report.
- Drafting and updating of the hospital's new plan for catastrophes and multiple-victim incidents.

# FOETAL ENVIRONMENT AND OBSTETRICAL COMPLICATION

Maria Dolores Gómez Roig, MD, PhD

## This year's highlights

*Our goal is to characterise the effect of exposure during pregnancy to all these substances in order to expand our knowledge about them and to be able to predict pregnancy complications relating to environmental factors such as growth restriction.*

*In 2018:*

- (1) *We published an article evidencing the serious problem of alcohol consumption during pregnancy. During the course of this study, the presence of EtG (an alcohol metabolite) was detected in the hair of a large number of pregnant women. For this reason, in 2018 we began an intervention study to reduce alcohol consumption in pregnant women.*
- (2) *We also began a study called BiSC (Barcelona Life Study Cohort), the purpose of which is to understand the effect of air pollution on the placental function, foetal growth, and cardiovascular and cerebral development of the foetus. This is a cooperative project of ISGlobal (Barcelona Institute for Global Health), BCNatal (Hospital Sant Joan de Déu and Hospital Clínic i Provincial de Barcelona) and the Hospital de la Santa Creu i Sant Pau. At present the group is in the process of recruiting 600 volunteers who live in Barcelona and who are in their first three months of pregnancy. Our group seeks to study the influence of the environment on obstetric complications and to decrease their effects in the prenatal and postnatal periods of newborns.*

## Members

### Staff researchers

Sergio Cabré Gili, Silvia-Irena Ferrero Martínez, Miriam Pérez Cruz, Joan Sabrià Bach, María José Tojo Grandio, Edurne Mazarico, Patricia Pagès

## HUMAN MOLECULAR GENETICS I

Daniel Raúl Grinberg Vaisman, PhD

### This year's highlights

In 2018 we described new genes and mutations responsible for intellectual disability in patients originally diagnosed with Opitz C or Bohring-Opitz syndrome (*FOXP1*, *ASXL1*, *PIGT*, *DPH1*, *MAGEL2* and others). We analysed the role of the *WNT16*, *DKK1* and *SOST* genes and of miRNAs in relation to osteoporosis. We have also participated in a multi-centre study on the determinants of osteoporotic fractures and we conducted functional studies on the *GGPS1* gene in relation to atypical femoral fractures. In the field of lysosomal disorders, we continued our studies on therapeutic approaches in neurons derived from iPS cells for Sanfilippo C syndrome and in the Niemann-Pick C murine model. In the field of neurogenetics, we identified genes involved in various neurological and psychiatric disorders (autism, migraine, aggressiveness, ADHD) and we investigated the shared inheritability between 25 brain disorders. We also proved the importance of paternally inherited regulatory genetic variants in autism. Dr R. Corominas joined this line of research this year. Her work is notable in such fields as 7q11.23 aneuploidies and autism.

## HUMAN MOLECULAR GENETICS II

Gemma Marfany Nadal, PhD

### This year's highlights

The research of our group, UB CIBERER U-718, is focused on identifying new genes causing hereditary retinal dystrophy, and on characterising their function. It should be pointed out that the composition of the group changed greatly in 2018. The group's senior leader is Dr. Marfany, and one CIBERER postdoctoral researcher and three predoctoral researchers in different stages of their doctoral theses have joined us. In 2018 we formed a spin-off, DBGen Ocular Genomics, to offer genetic diagnosis to families affected by hereditary retinal disorders. In the research field, the group has developed new gene analysis tools: 1) cellular tools (primary cultures of retinal and hippocampus neurons), 2) organoids (retinal cultures, generation of optical cups from patient-derived hiPSC cells), and 3) animal cells (zebrafish, knockout mice generated by cre/loxP recombination, and mice models generated using CRISPR gene editing). In short, 2018 was a year of change, consolidation and growth.

## PHARMACOLOGICAL TARGETS IN INFLAMMATION AND METABOLIC DISEASES

Manuel Vázquez Carrera, PhD

### This year's highlights

In our group we made two notable findings in 2018. On the one hand, we advanced in the study of the PPAR (peroxisome proliferator-activated receptor)  $\beta/\delta$  nuclear receptor in the regulation of non-alcoholic fatty liver development and, more specifically, of how this receptor modulates the VLDL and FGF21 (fibroblast growth factor 21) receptor levels in the development of this disorder. Additionally, we also proved how the BACE1 ( $\beta$ -secretase/ $\beta$ -site amyloid precursor protein (APP)-cleaving enzyme 1) enzyme and the product of its activity, soluble APP $\beta$  (sAPP $\beta$ ), take part in the occurrence of endoplasmic reticulum stress, inflammation, and insulin resistance induced by lipids in skeletal muscle.

## MICROBIOTA INTESTINAL

Laura Baldomà Llavines, PhD

### This year's highlights

In the context of the research line focused to the study of membranes vesicles (MVs) secreted by gut microbiota and probiotics we have contributed to prove the role of these MVs in the immune priming mediated by gut microbiota. Activation of the cytosolic immune receptor NOD-1 by internalized microbiota MVs in intestinal epithelial cells leads to controlled inflammatory responses that contribute to the training of immune system. This is an essential mechanism to trigger appropriate immune responses against invading microbes to assist pathogen eradication and host survival. In addition, we have provided new insights on the role of microbiota MVs and secreted factors on the modulation of intestinal tight junctions, expanding their barrier-protective effects against pathogen-induced disruption.

## COGNITIVE NEUROSCIENCE

Carles Escera Micó, PhD

### This year's highlights

In 2018, our research group continued with its activity in the study of brain mechanisms of auditory perception, in both the healthy population and in ageing population, especially promoting the research line addressed to identifying biomarkers for neurocognitive development in newborns. The most notable activities during this period were the holding of the 8th Mismatch Negativity Conference "MMN from basic science to clinical applications", in Helsinki (Finland) in June 2018; the guest lecture held at the University of Toronto (Canada) "Neurocognitive mechanisms in audition as revealed with the frequency-following response"; and the leading of two work packs (RL2-Psychoacoustics and RL3-Neuroscience) in the project "ARTSOUNDSCAPES - The sound of special places: exploring rock art soundscapes and the sacred" financed with an advanced grant from the European Research Council (ERC; EC grant agreement number 787842).

## HEALTHCARE TECHNOLOGIES AND RESULTS IN PRIMARY CARE AND MENTAL HEALTH (PRISMA)

Antonio Serrano Blanco, MD, PhD

### This year's highlights

The set of projects on initial medication non-adherence received three distinctions: the prize for the best article on health economy in Spain from the Health Economy Association; the ASISA research grant to expand the study in the paediatric population; and the CAMFIC grant to study initial non-adherence to cardiovascular treatment.

The group —together with CIBERESP's GenRisk consortium— also obtained a research grant from the Spanish Association against Cancer for the study of genetic and metabolic screening to prevent colon cancer. We continued to carry out territorial diagnoses of health services and risk factors in various areas of Barcelona province through Barcelona Provincial Council. We held the 12th edition of the Economic Assessment and Community Healthcare Policy Course, likewise participating in the courses of the School of Public Health in Mahón.

### Members

#### Staff Researcher

Luisa Baldon Higuera, Vanessa Barneda, Laura González Suñer, María Iglesias González, Cristina López Ortiz, María Rubio Valera, Enric Vicens Pons

#### Postdoc - associate researcher

Ignacio Aznar Lou, Elisabeth Parody Rua

#### PhD student

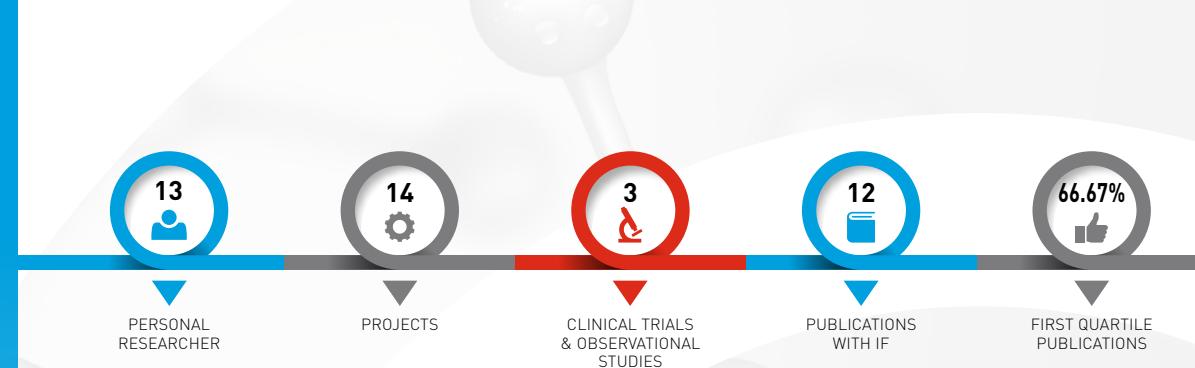

Gabriela Murugarra Centurión, Carles Vilaplana Carnerero

#### Assistant researcher

Montserrat Gil Gribau

#### Collaborator researcher

Ana Fernández Sánchez, Ana María Jove Massó, Martín Knapp, María Antonia March Pujol, Paul McCrone, Juan Manuel Mendié Arbeloa, María Teresa Peñarrubia María, Ramón Sabés Figuera, Luís Salvador Carulla

### Selected projects

- Modelling of the complex intervention "Initial Medication Adherence" (IMA) in primary care: Non-Adherence phase-I study. Ajuts rececera PSSJD. Parc Sanitari de Sant Joan de Déu - Serveis de Salut Mental. PI: María Rubio Valera. 01/02/2018-31/01/2019
- Prevalence and impact of initial non-adherence to pharmacological treatment in the paediatric population: paediatric initial treatment non-adherence study. Proyectos de Investigación en Salud. Proyectos de Investigación en Salud. PI: María Rubio Valera. 01/12/2018-30/11/2019
- Intensificació facultatius. Departament de Salut - Generalitat de Catalunya. PI: Antoni Serrano Blanco. 17/02/2018-31/12/2019
- Genetic and metabolomics screening towards the precision medicine in cancer prevention. Grupos Coordinados Traslacionales. Fundación Científica de la Asociación Española Contra el Cáncer (AECC). PI: Antoni Serrano Blanco. 01/08/2018-31/07/2023

### Selected clinical trials & observational studies

- Estudio observacional de postautorización para evaluar la seguridad de ADASUVE® (Loxapina para inhalador Staccato) en personas agitadas en la práctica clínica habitual. Promotor: Alexa Pharmaceuticals. PI: Antoni Serrao Blasco. 16/07/2015-
- Aripiprazole once-monthly versus daily oral atypical antipsychotic treatment in patients with recent-onset schizophrenia: an observational, non-interventional study. Promotor: Otsuka Pharmaceutical, S.A. PI: Antoni Serrano Blanco. 30/05/2017-

### Networks

## Notes

The **team membres** of areas and groups presents all information of the group including external collaborators. The global numbers of the institution does not include external collaborators.

The number of **projects** shows the total number of projects managed and active during 2018.

**Clinical trials** and **observational studies** correspond to all those active during 2018.

**Publications** include original articles and reviews published during 2018 (with assigned pagination) and authored by members of research groups during their membership. The impact factor and quartile assigned corresponds to the Journal Citation Reports of the Web of Science of 2017.

The **Budget** is the total resources managed.
